Suggestions:

1. **Safety First** – food and utensils are safe from contamination, weather, and critters.
2. Note the amount of time that you have for meal and cleanup. Plan menu accordingly.
3. Balanced meals – follow food pyramid.
4. Know availability of drinking water and plan accordingly.
5. Always have a quick hot drinks (hot choc, soup mix), cold drink, and extra snacks.
6. Consider enclosing menu in weather-proof bag, who in the patrol should have a copy and where it should be displayed at activity.

A Scout is Thrifty. Ask patrol member if they can bring some items from home (get parent's okay). For example, maybe a scout can bring an egg or two (for a cake) from home instead of the patrol buying a dozen eggs. Save money and weight.

Grubmaster and Assistant Grubmaster – your patrol job is to procure the menu food and the other items needed to prepare those meals and cleanup but within the **budget.**

Fireman and Assistant Fireman – your patrol job is to procure fuel required for activity. The Troop Quartermaster will have charcoal and propane fuel, but you and fellow patrol members will gather wood if wood fires are planned. Also procure shovel, ground shield.

Quartermaster and Assistant Quartermaster – your patrol job is to procure the gear needed and return all in clean and good working order – tents, patrol kits, stoves, etc.

Patrol Shopping List
